

TAU™ THERMOCORE SERIES

WARMTH & PROTECTION – JUST THE WAY YOU NEED IT.

Our ThermoCore Series fabrics include a broad spectrum of available technologies for warmth no matter what temperature or activity. Advances in fiber and finishing technologies are constantly bringing new options to the ThermoCore Series fleeces.

THERMOCORE PRIME

A popular choice for mid to heavy weight fabrics and available in a large range of applications and finishes

THERMOCORE MICRO

Made from the finest micro yarns delivering lightweight performance with a superior warmth-to-weight ratio

THERMOCORE TEXTURE

Special knits with application-specific textures and finishes

USE:

Works well alone or in combination with other fabrics. Our most flexible series, ThermoCore Series fabrics can be adapted for almost any insulation or weather protection application.

SERIES BENEFITS:

- Excellent Heat Retention Without the Weight
- Quick Drying Times
- **High Breathability** – moisture vapors are released easily through the fabric
- **Excellent Durability** – non-piling and machine washable
- **Water Resistance** – select ThermoCore Series fabrics are highly effective at shedding water
- **Easy Care** – machine washable and dryer safe
